

Manual Test Plan

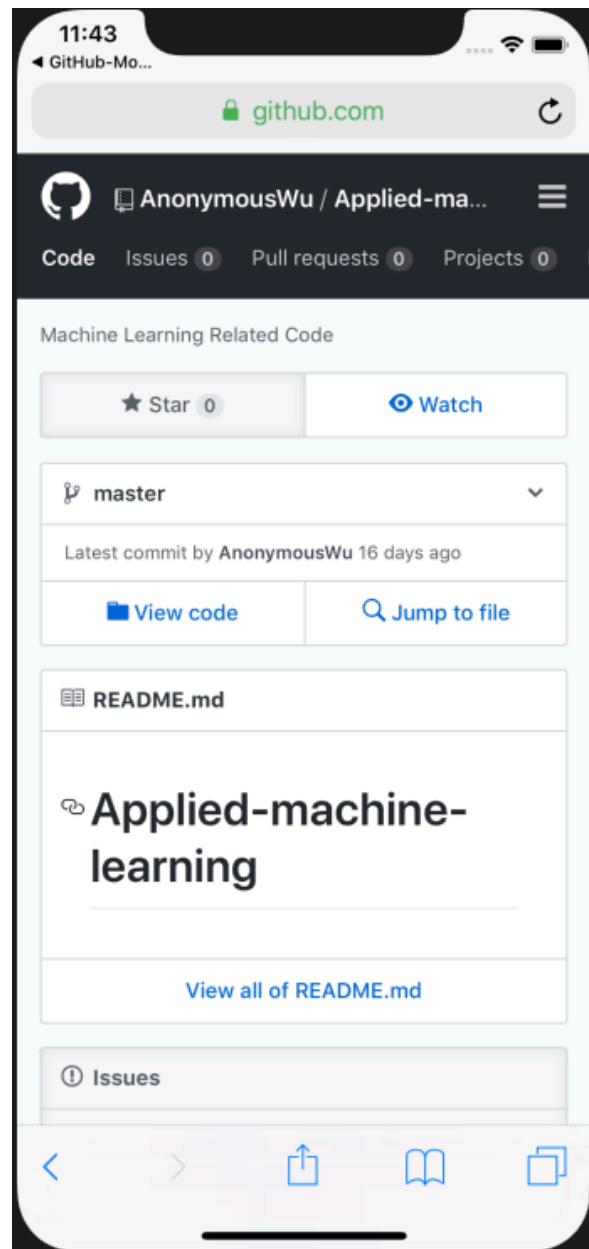

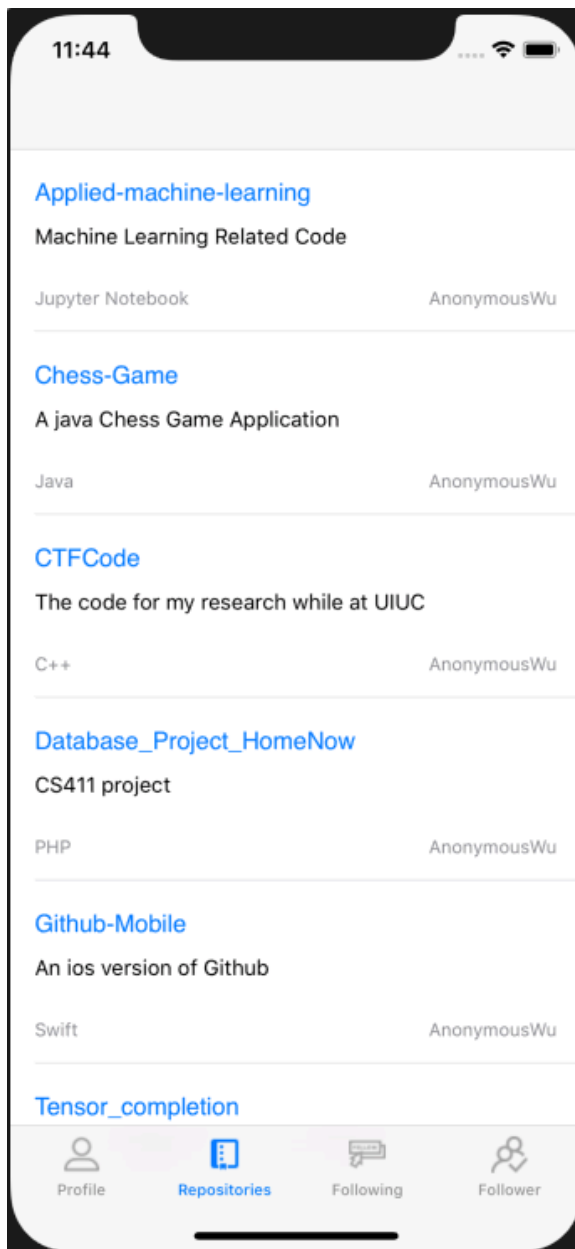

- **Profile Page (start page):**

- Information on Users Profile avatar image view, Name, GitHub username, Bio, Email, Profile create date; these attributes are view only
- Information on Users Public Repos count, Followers count, Following count; these attributes are clickable. After clicking “Repositories”, “Followers”, “Following” below the respective counts, it will navigate to the corresponding pages.

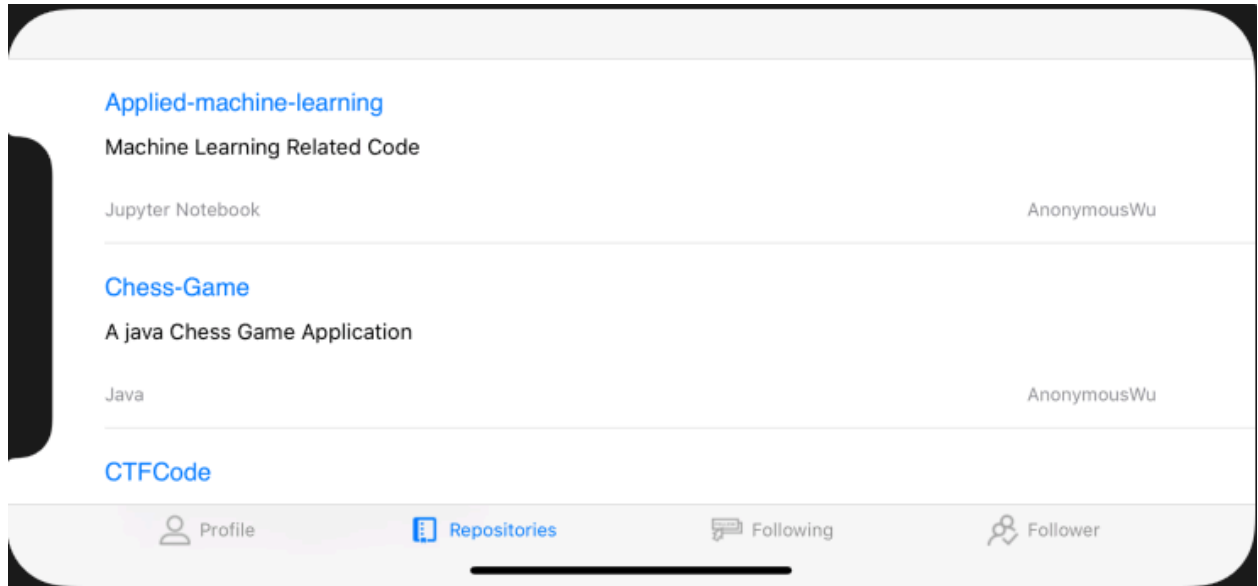

- **Repositories Page:**

- To view the Repositories page, simply press the “Repositories” button on the tab bar located at the bottom of the screen.
- The repositories page displays a list of the public repositories of the specified user. Each repository have Repository name, owner’s GitHub username, Repository description and programming language
- Scroll down the screen to view the full list/table of the repositories
- When clicking(selecting) the repository cell, it will pop up a new window and open the corresponding GitHub webpage

- Adaptive to the Landscape View

- **Following / Followers Page**

- Empty pages for this week
